5 Street Nylon
Bafoussam, West

**Summary**

Enthusiastic Software Engineer, Detail-Oriented Computer Engineer in experience participating in complete project development lifecycle of successfully launched applications. Seeking to use proven skills in JavaScript and Project Management to meet business needs

**Education**

### Bamenda University of Science & Technology

Software Engineering • Bamenda, Northwest                                       11/2016

Heavy concentration in data structures, PostgreSQL, MongoDB and Cloud

Organized the University hackathon in 6 conservative months

Build a customer service web app for a junior Scholar project

**Skills**

- JavaScript, ReactJS, Redux, NodeJS, PostgreSQL, MongoDB
- Computational Research and Development
- Practical knowledge of SQL and database concepts
- Deep Learning for JavaScript ( DL4J) toolkit

**Experience**

### EAGLE TAG

Software Developer • Perth, Western Australia                           04/2017 - Present

Build modern Application with JavaScript, React, Nodejs, Express, MongoDB called the MERN

Oversaw design errors and upgrade development to enable testing methods of prototypes to be use in development

Ensured Continuously integrated and deployed developed software. Updated the continuous intergration/deployment scripts as necessary to improve continuous intergration practices

### PARA-TECH

Application developer • Douala, Littoral                                 02/2018 - Present

Consulted with Product Manager to identify minimal viable product and decomposed feature set into small scoped user stories

Industrial experience in modeling and occasional use of software parameters with great understanding of workflow and modules

Ensured the uninterrupted flow of business-critical operations. On-time error analysis reduced downtime by 15% and costs of warranty by up to 25%

**Languages**

- English
